

In the Claims:

Claim 1 (twice amended). A rotatable body for printing machines, the rotatable body comprising:

C1 a circumferential surface provided with a surface structure and formed of a nonmetallic material, said circumferential surface carrying a liquid and being a roller selected from the group of rollers consisting of a slip roller and a vibrator roller.

C2 Claim 10 (amended). A printing machine comprising at least one roller with a circumferential surface provided with a surface structure and formed of a nonmetallic material, said circumferential surface carrying a liquid, and said roller being selected from the group of rollers consisting of a slip roller and a vibrator roller.

Enter the Following New Claims:

*N.E.
(already done
by amdt "B")* --11. The rotatable body according to claim 10, wherein said circumferential surface carries a viscid liquid.

12. The rotatable body according to claim 10, wherein said circumferential surface carries an offset printing ink.

13. The rotatable body according to claim 10, wherein said circumferential surface carries a printing-ink emulsion.

14. The rotatable body according to claim 10, wherein said circumferential surface carries a dampening-solution emulsion.--

Remarks:

Reconsideration of the application is requested.

Claims 1 to 14 are now in the application. Claims 11 to 14 have been added and claims 1 and 10 have been amended. A marked-up version of the claims is attached hereto on a separate page.

The instant amendment is the same as the amendment filed by facsimile on September 9, 2002. However, in the instant amendment, claim 1 has been amended the same as claim 10, and for the same reasons. No new matter has been added.
